

Advanced Practitioner (AP) Primary Care ECHO

What is ECHO?

- ECHO stands for 'Extension of Community Healthcare Outcomes'
- Supports knowledge sharing between professionals from across health and social care, and facilitates the exchange of specialist knowledge and best practice

How does an ECHO session work?

- Welcome
- Your introductions and feedback
- Agenda
- Didactic (expert's talk) 30 minutes including discussion
- Case presentations from Community of Practice and discussions
- Summary and putting new knowledge into practice
- Plans for next sessions

Target Audience

This programme is designed for any Advanced Practitioner or Trainee Advanced Practitioner working across the Primary Care sector.

Previous programmes of Project ECHO for APs have evaluated well with participants appreciating knowledge gained from experts in the field, as well as the opportunity to meet other APs and share good practice across the region, as well as nationally.

Session	Date	Time
